Public Reception and Banquet

We would remind the public of the banquet to be held Monday evening next in the Masonic Hall at 8 p.m.

The guest of honour will be Miss Margaret Fitzpatrick, and many other notables have signified their intention to be present, among whom are:

Hon. F. Grisdale, Minister of Agriculture, Dr. Stanley, M.P., F. Spooner, President Calgary Board of Trade, Inspector Bavin, R.C.M. P., Mrs. Blight, President Altomah Club, Calgary, Chief D. Ritchie, Calgary, Geo. Sutherland of Midnapore, Mr. and Mrs. Clark of the Altomah Club, Calgary.

The high light of the usual musical programme will be the well known MacDougall family of Calgary, who require no introduction to this community, and are well-known as entertainers of sterling worth.

You miss one of the season's best gatherings if you absent yourself next Monday evening.

Inter School Track Meet

Friday, October 5th.

The Rosebud School Field Meet will be held this year at Crossfield on Friday 5th. October. This is the first time that the Meet has been scheduled for Crossfield.

Competing Schools comprise Innisfail, Olds, Didsbury, Bowden, Carstairs and Crossfield.

Many track events will be run off as well as other athletic events, included in which is putting the shot (senior and intermediate boys), baseball throw (junior boys), pole vault, running broad and high jumps, softball throw for senior and intermediate girls, hop, step and jump.

The presence of the public is invited to lend their support, and encourage these young athletes.

SHOOTING SEASON

OPENS SATURDAY

Twelve o'clock noon, Saturday, September 15, is the opening of the fall hunting season for ducks, geese and Hungarian partridge. The season for prairie chickens opens on October 1 and runs to the 15th, with chicken season allowed a full month north of the Red Deer River.

THRESHING DELAYED

Rain and sleet followed by a three inch fall of wet snow on Wednesday night, again delayed threshing and it will be several days before the grain will be dry enough to thresh. The yields vary all the way from 10 to 40 bushels to the acre, grading No. 1 and 2.

To Improve North Crossing

Thos. Tredaway, Secretary of the Board of Trade has been in communication with W. Manson, Supt. of the C. P.R. in regard to making some improvements to the north railway crossing. Mr. Manson has promised to have this work done in the near future.

Good Crops at Madden

Malting Barley Brought 75 5 8 cents

Arthur Brown of the Madden district sold 600 bushels of barley to the Canada Malting Co. Ltd. Calgary for 75 5-8 cents per bushel on Tuesday.

Mr. Brown has a good crop and while he has considerable to thresh yet, the results so far have been most encouraging, wheat on spring plowing making 26 bushels to the acre, and barley is not only yielding good but is of the highest grade.

Duncan Cameron of Madden had 60 acres of Garnet that yielded 38 bushels to the acre. On this field Mr. Cameron used Elephant Brand Fertilizer, and it gave him 10 bushels to the acre more than the unfertilized land.

Calf Club Show and Sale

Main Feature at School Fair

The Boys and Girls Calf Club Show and Sale held on School Fair Day was once again a most decided success. Ten calves were brought out and each and all of them were in splendid condition, showing the best of feeding and care, and all of them were handled by the children in a most workmanlike manner. John Wilson Innisfail, well known cattleman was sent down by the Provincial Government to place this class, but before proceeding to do so, the members had their chance to show their ability to judge them.

This competition was a walkover for the Leask family, first place being won by Isabel, second by Donald, and third by Catherine.

The judges placing was as follows:

1. Catherine Leask.....Shorthorn
2. Lila Havens.....Hereford
3. Eugene Havens.....Hereford
4. Donald Leask.....Hereford
5. Clara Calvert.....Shorthorn
6. Isabel Leask.....Shorthorn
7. Evelyn Havens.....Hereford
8. Clarence Riddell.....Shorthorn
9. Joe Lennon.....Hereford
10. Fred Kinniburgh.....Shorthorn

Following the judging the calves were sold by auction by J. W. Durno who was successful in obtaining the following prices:

The first prize calf not being offered the second prize animal was bought by the T. Eaton Co. Calgary for six cents per pound. 3rd. to F. Eaton at \$5.25 per 100 lbs. 4th. to J. G. Harrison at \$5.10. 5th. to Eaton Co. at \$4.75. 6th. to Union Packing Co. at \$4.50. 7th. to Union Packing Co. at \$4.50. 8th. to J. G. Harrison at \$5.00. 9th. to Union Packing Co. at \$3.20. 10th. withdrawn from the sale.

After the sale the Union Packing Co. purchased the first prize animal for \$60.00.

It seems to us that a show and sale of this calibre must be both educational to the boys and girls and profitable to their parents, which makes it surprising that more and more boys and girls do not join this Club. This year it almost failed for lack of numbers as the Government will not support a Club with less than ten members, and had one of the above withdrawn on Fair Day it would have been a washout.

GILBERT MORRISON

Mr. Gilbert Morrison passed away on Tuesday forenoon at the home of his daughter, Mrs. A. W. Gordon.

The late Mr. Morrison was born of Scottish parents in Owen Sound, Ontario, the 24th day of February 1847.

He leaves three daughters and eight sons to mourn his loss, four of the sons served overseas in the Canadian Forces, one son Victor died of wounds in France.

He farmed in the County of Grey, Ontario till 1909, when he moved West to the Olds district and in 1911 went to Delia district, where he farmed until his retirement a few years ago.

Funeral services will be held at Delia on Friday at 2 p.m.

Council Meeting

At the last regular meeting of the Village Council it was decided to lay the foundation for the new sidewalk along Strathcona Avenue, this month, after which it will be surfaced with Alberta tar sands.

The moving of the skating rink came up for discussion and it was decided that before anything be done with the present site that a well be drilled and a plentiful supply of water assured.

The present rink will be used this winter, and some repairs will be made to fence, while a well will be put down and the rink moved next year, providing a satisfactory arrangement can be made with the local well driller for a guaranteed well.

A ten per cent discount will be allowed again this year on all current taxes paid by Nov. 1st.

A speech should be like a woman's skirt, long enough to cover the subject, but short enough to be interesting.

Uniform Price System Advocated

Introduction of a uniform price system throughout Canada as a means of distributing whatever benefits result from protective tariffs and of equalizing production costs, was advocated by J. D. McKenna, St. John, N.B., publisher, in a recent submission to the royal commission investigating Nova Scotia's economic situation.

Urging equalization of wholesale prices of all protected goods manufactured in this country, Mr. McKenna contended that Montreal and Toronto virtually monopolized whatever benefits resulted from protective tariffs. Eighty-five per cent. of manufactured goods came out of Ontario and Quebec, he said, and because costs of the finished articles included all the taxes imposed by governments, provincial and federal, it followed that people of other provinces purchasing those goods, had to "pay not only their own taxes but theirs as well—and that comes in a pile of money."

His scheme to equalize costs and to standardize prices throughout the country, involves absorption by manufacturers of freight charges, a process with which many in Western Canada would be prone to agree. This, Mr. McKenna claimed, would permit manufacturers to place their products on the market at a uniform price—the same in Halifax, Regina and Vancouver as in Toronto and Montreal. Press despatches note that at the close of his presentation, Mr. McKenna was complimented by Prof. John Harry Jones, of Leeds University, England, who, noted as an economist, is chairman of the commission.

The contentions and proposals of Mr. McKenna are by no means new to Western Canada. Least of all are they new to a certain small group of Saskatchewan economic students which, for two years or more, has quietly been conducting inquiries along similar lines, with a view eventually of sponsoring a plan which might be adopted as a "Western Policy." This group has concentrated its attention upon the price structure, seeking to determine what inequities exist with it, noting more particularly the effects upon it and upon the purchasing power of the prairie provinces of freight, tariff and taxation costs.

The former favorable disparity in wage and salary scales as between Western and Eastern Canada having disappeared under stress of economic conditions, or being noticeable only in reverse, the Saskatchewan group has been seeking something to compensate the loss. Though prices of manufactured goods had fallen, the drop was commensurate with the drop in prices of farm products, and seemed to be determined largely by the reduced purchasing power of consumers in the West. Somewhere within this price structure, it was felt, lay certain factors which, if equalized or removed, would effect much-needed adjustment.

The Saskatchewan group has laid stress on the fact that, while freights and tariffs have increased farmers' production costs, they have received no compensation from manufacturers of consumers' goods, nor have the advantages accruing to the industrialized areas been distributed as, it was thought, they should be. From this it was argued that, as consumers, prairie farmers were encouraging a system which tended to centralize industry in the Toronto and Montreal areas, which areas derived direct benefits from local taxes payable by the industries and from circulation of the payrolls of such industries. This system, it was contended, placed the West under toll both at home and in the East.

It was felt, therefore, that, inasmuch as these advantages were accorded the manufacturing areas of the East, there should be some compensatory factor, some method of distributing benefits, to all parts of Canada in the price structure. That is to say, while goods might cost a little more in the area of their manufacture, they would cost a little less in the area of their consumption. And inasmuch as the principle already is applied in the case of nationally-priced products, the proposition at first sight appears fair and just. The West will watch eastern reactions to the proposal made by Mr. McKenna, with considerable interest.

Border Cuts Off Hospital

Free State Board Has To Cross Line To Inspect It

Derry Port sanitary board has just held a remarkable meeting, the members leaving Northern Ireland to go into the Free State to deal with the business for which the meeting was summoned.

The board crossed the border in taxis to inspect its hospital at Ballyrattan, near Mullin, in County Donegal, a hospital which has never had a patient since its opening thirteen years ago. It was built to deal with cases of infectious disease on vessels coming to Derry, but before its completion, the border had been created, with the result that the board was left on one side of the border and the hospital on the other.

No solution of the situation has ever been devised and the board decided to effect repairs to the institution, the chairman remarking that "the present state of affairs cannot go on forever."

South Africa Satisfied

Secession of South Africa from the Empire is as "dead as a doornail," according to General Smuts. Yet 34 years ago says the Ottawa Journal, General Smuts was riding the wild, warping on the Empire. History tells of little more splendid than this conciliation between Briton and Boer.

Few People Escape Attacks Of Summer Complaint

Summer Complaint may be slight, or it may be serious, but you can't tell when it seizes you how it may end. Allow the profuse diarrhoea, the vomiting, the purging to continue, for a day or two, and you may become weak and prostrated. Just as soon as you feel any looseness of the bowels go at once to your drugist and get a bottle of Dr. Fowler's Extract of Wild Strawberry and check this untoward action before the weakening looseness can get started. Don't experiment. Get "Dr. Fowler's." It has been on the market for 88 years.

Not Very Profitable

Abraham Lincoln Made Very Little From Law Practice

When Abraham Lincoln was elected president of the United States, his bank balance aggregated \$641.44. The original ledger showing his account now is on display in the Springfield Marine bank at Springfield, Illinois, where Lincoln was a depositor from March 1, 1853, until his death. His account after his death was continued by his administrator, Judge David Davis, of Bloomington, Ill., being finally closed on May 22, 1867.

The ledger in which his account appears is displayed in a glass and wrought-iron show case. The ledger is turned to a page on which is written in fine script the name "A. Lincoln" and the entries on the page bear out the certainty that his income from the practice of law was meagre at times.

COULD NOT SEW A BUTTON ON

Her Hands Were Helpless With Rheumatism

At one time she thought she would lose the use of her right hand. But a blessing—in the form of Kruschen Salts—put her right again.

"I was sure in a bad state," she writes. "In fact, I could not do my housework. I was so bad with rheumatism in my arms and hands. I could not sleep at night, and I thought I would lose the use of my right hand. I could not hold anything, nor could I sew a button on. My arm would go dead. I was advised to try Kruschen's help and relief." (Mrs.) J. H. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals, which are responsible for rheumatic agony. Other ingredients of these salts assist Nature to expel these dissolved crystals through the natural channel.

Wheat Situation Hopeful

Supply For 1934-35 More Closely Related To Probable Demand

The crop year 1934-35 is commencing with the general wheat situation not without its hopeful aspects. The Dominion bureau of statistics states: "The supply of wheat available for the present cereal year has been greatly reduced by virtue of a second successive crop disaster in the United States, the certainty of a low yield in Canada, a sharp reduction in production in many European countries and the prospects of a small crop in Australia. These developments come to produce a situation where the available supply of wheat is more closely related to probable demand than at any time in recent years, the bureau said.

According to the United States Department of Agriculture, production of corn, wheat, oats, barley, rye and flaxseed are expected to be the smallest in 30 years.

Value Of The League

Exerts An Immense Force In The Prevention Of War

There is probably not a single country in Europe where the common people would blindly follow its leaders into war, if called upon to do so. All the nations of the world have in fact formally renounced war as an instrument of national policy; and the machinery of the League of Nations exists for its prevention. It is quite certain that, if war were imminently threatened, or were actually to break out in one quarter, resort would be made to the League, whose power of collective action, even if never yet fully utilized, is potentially immense. Its mere existence has undoubtedly acted as a deterrent at least upon the lesser nations and upon those which are not removed by oceanic distances from Geneva. London Times.

Experimenting With Dry Ice

Air Cooled Planes Would Facilitate Travel In India

A transportation company in India is experimenting with dry ice, or cold carbon dioxide, as an agent for cooling aeroplanes. If satisfactory results are obtained, planes travelling across that country will be air cooled in future. Should experiments prove successful travel should be facilitated between Calcutta and Bombay, where summer temperatures of 115 degrees are considered normal and 130 degrees is sometimes exceeded.

Doorkeeper—Here, come back Dogs are not allowed in here, sir. Visitor—That's not my dog. Doorkeeper—Not your dog? Why, he's following you. Visitor—Well, so are you.

A Wonderful Operation

Severed Eye Muscle Seved And Woman's Sight Restored

An operation—one of the most delicate in eye surgery—has restored sight to a Memphis woman. Platinum needles electrically heated, punctured the eye 20 times in the course of the skilful surgery which regained for Mrs. Westwood Sayre 75 per cent. normal vision.

She lost the sight of one eye in June as she returned to her home from her flower garden. The other eye was not affected. A noted Memphis eye specialist said it was retinal detachment.

Severing a muscle he turned the eyeball inward. Foreign fluid had accumulated behind the retina causing it to bulge toward the centre of the eye. The retina is the curtain on the back of the inside of the eye on which images are focused and nerve sensations are transmitted to the brain. Blindness results if the retina is disturbed.

On the outside and back of the eyeball is a fibro-muscular covering which controls the movements of the eye and keeps the eyeball in shape. From the outer edge of the fibro-muscular coating to the area under the bulging retina was a distance of one-eighth inch. A tiny traction would be pierced, endangering both sight and loss of vitreous, the jelly-like substance that keeps the eye round.

Twenty platinum needles, each one-eighth of an inch long, each with a silk thread in one end, were placed nearby. Clamping the first with an instrument which brought electricity to the needle until it was hot, the surgeon inserted the fiery point into the small area.

Twenty times the eyeball was pierced. Then slowly he grasped the thread and pulled out each needle. The severed eye muscle was sewed.

For two weeks the patient lived in total darkness, her head bandaged to prevent movement which might break tiny connections where the needles had seared through the eyeball, allowing one-half teaspoon of fluid to drain off and causing the retina to slip when it resumed its normal position.

The retina slowly dropped back into position. The eye healed. Bandages were removed. Light filtered into the retina. Objects became distinct.

Interesting Old Clock

Timepiece Of Catherine The Great To Be Repaired

A 17th century clock, made by James Kierke, an English craftsman, and presented to Catherine the Great by her favorite, Marshall Potemkin, is to be restored, says a Leningrad message. The clock, which is of great artistic value, has not been in working order since 1915. When it is in working order, at noon every day the image of a peacock on the clock stands up and spreads its tail, which is made of gold; a cock, four or five times larger than life-size, starts crowing; and an owl, sitting on a branch above, rings a number of small bells.

Faster Planes Needed

French Air Staff Says Paris Would Be Helpless From Invasion

An invading air fleet will wipe Paris completely off the map unless France gets faster fighting planes, the French air staff believes. Officials said the four-day aerial manoeuvres recently held, showed conclusively that the capital cannot, with present effectiveness, be defended against air raiders, and emphasized sharply the urgent need for speedier aircraft.

A force of rebuilt pursuit planes failed to match the speed of heavily loaded bombers, comprising the "attacking fleet," the average speed of which was 140 miles an hour.

June—"My Scotch boy friend sent me his picture yesterday." Joan—"How does he look?" June—"I don't know yet. I haven't had it developed."

Many new commercial ships are being put into service in Greece.

Stop the pain and soothe the inflammation at once. Prevents further destruction and relieves the pain. Keep a supply of Mecca Ointment in your home to meet all emergencies. Mecca Ointment is sold by all Druggists—25c (tube), 50c and \$1.00.

W. N. U. 2063

Plug tobacco goes farther, because it lasts longer in your pipe. It's fresher, too, because the big plug doesn't dry out and you cut it coarse or flaky, to suit yourself.

DIXIE

PLUG SMOKING TOBACCO

Ontario Municipal Debt

Stated Debt Is Largest Of Any Province In Canada

Thomas Bradshaw, president of the North American Life Assurance Company, told the Ontario Municipal Association Ontario's municipal debt in default is the largest of any province in Canada.

Forty municipalities in Ontario, Mr. Bradshaw said, are in default to the extent of \$96,640,819 while the nearest approach to that figure is found in Quebec where the defaulting debt is \$15,000,000.

"No section of Canada, up to four years ago, has a finer reputation for municipal credit than the province of Ontario," he said. "To-day no section in Canada has a more serious municipal problem on its doorsteps than Ontario."

Moose Is Fast Runner

Proved It By Travelling 35 Miles An Hour

How fast is a moose? Ask Charles Mumford of Yarmouth, Nova Scotia. He'll say 35 miles an hour.

While Mumford was motoring home to Yarmouth a young bull moose in the road became frightened by the headlights and started running ahead of the car, maintaining his distance for a time while the moose travelled 35 miles an hour. Coming to a rise, the moose slowed to a 20-mile rate, leaped from the road and became tangled in a barbed wire fence. Mumford and others from the car were able to help the animal escape by shaking the fence.

Switzerland Heads List

Leads All Countries In Annual Consumption Of Milk

Statistics released by the Department of Agriculture show that Switzerland leads all other countries of the world in the annual consumption of milk, with 280 quarts per person. Second place for this distinction is shared by Switzerland and Germany, each of which boasts of 220 quarts per person. Canada ranks next with 200 quarts.

The figures on other large milk-drinking nations also computed annually and per person, are as follows: France, 100 quarts, and Chile, 30 quarts.

Evidently He Knew

"Bambo," said the magistrate reproachfully to the negro before him, "I cannot conceive of a man, more cowardly than you, of deserting your wife. Do you realize you are a deserter?" "If you knowed dat lady as I does," replied Bambo, "you wouldn't sho' call me a deserter. Ah is a refugee—dat's what Ah is."

Applies To Advertising

If you had a whole bushel of chain links, it would not pull a load. Put them together in a continuous chain and you have a strong and powerful thing with which to pull a load. So it is with advertising. Link your ads together, run them in a continuous string, week after week and you will produce results.

There are 1,225,700 miles of motorway roads in Europe and the British Isles.

It Could Be Done

Midland Gardener Used Only Waste Water For Plants

At the Midland Bank Horticultural Society's show it was remarked that the winner of seven prizes exhibited blooms watered entirely with waste water, bath-water, basin-water; at any rate not fresh tap water, of which he proudly boasted that he had not used a drop in his garden during these months of drought. It can be done. Therefore it ought to be done—as King Edward was fond of remarking mainly of things that were not done in his time. Do not ask us, please, how to get or convey bath water. Either find out, or don't use any water. A moral maxim for horticulturists.—London Daily Mirror.

Super-Race For Alberta

Development of a superior race of people such as has never been known in the world before was pictured as the future of Alberta through the combining of the province's wealth of natural resources and the ideals of the cosmopolitan population which live within its boundaries, by W. R. Howton, M.P.P., provincial Liberal leader, in an address given at Edmonton.

The United States ships quite a lot of shoe blacking to Africa. The natives probably use it for cold cream.

King George V. once paid \$8,000 for a rare stamp.

Radio-Telegraphic Service In Northern Hinterland Now Proving Of Great Importance

Radio telegraphic business in the North West Territories is increasing with indications the current year may establish a peak for the service. Installed about six or seven years ago the chain of wireless stations, operated by the Royal Canadian Signals, a branch of the permanent force, is busier with commercial traffic than with official or departmental work. This chain extends from Edmonton to McMurray and from that point, which is the terminus of the landline, down to the mouth of the Mackenzie River.

The principal stations are at Fort Chippewyan, Fort Smith, Rae, Reliance, Fort Norman, Cammell River and Cameron Bay on Great Bear lake, and Akilvik. Two radio posts are operated in the Yukon, at Mayo and Dawson. The most northerly is at Herschel Island.

The general movement into the north country has emphasized the importance of the government's chain of wireless stations. Mineral deposits around the shores of Great Bear lake have resulted in the establishment of numerous small settlements in that region, while reports indicating a rush of gold prospectors to the latest discovery on Lake Athabasca.

Of prime importance, particularly to agriculturists and to shippers of perishable goods, are the daily meteorological reports sent by the government signalers. The weather for the North American continent is "made" in the valley of the Mackenzie River, and the compiling of these at Toronto constitutes one of the most important of government services.

Highest In World

Great Britain Nets Millions From Succession Duties

The St. Thomas Times-Journal says: "In no country are the succession duties so high as in Great Britain, where, if the estates are large enough, the Chancellor of the Exchequer confiscates almost the lion's share of the amount. The Cowdray estates are a case in point. "The first Lord Cowdray died in 1927, leaving an estate valued, in dollars, at 20,000,000. The death duties amounted to \$8,000,000. In 1932, his widow died, her estate probating at just over \$7,000,000. Of that amount the Treasury garnered exactly \$3,000,000. This year the second Lord Cowdray passed away leaving about \$2,500,000, and the duties were around \$750,000.

"So that these three deaths netted for the government nearly \$12,000,000 out of an estate that was originally \$20,000,000.

There is not much left for the third Lord Cowdray, who is the only son, and his five sisters. The British Treasury certainly makes the rich pay."

Bishop's Bribe Shown In Cathedral Paintings

Structure Said To Have Been Built As Penance

Wall paintings 900 years old have just come to light in Norwich cathedral, England, as the result of restoration work by Professor Tristram of the Royal College of Art.

Especially interesting are three medallions supposed to depict the life story of the cathedral founder, Bishop Herbert de Losinga. The paintings bear out in a remarkable way the tradition that Losinga built the cathedral as a penance for buying the bishopric.

One medallion shows the bishop passing money across a table. The next shows him clothed in the full robes of a bishop with hands joined in prayer, and the last one is a picture of the completed cathedral. Professor Tristram says the paintings may last another 100 years.

A Cannibal Spider
The black widow spider, whose bite has caused several recent deaths in the western states, is not a sociable sort of insect. Mrs. Sarah Hill found three females and two males of the species in her cellar in Gunnison, Utah. She put them in a fruit jar and placed them on exhibition in a local barber shop. One of the females got hungry and ate up her four companions.

A novelist, who confesses that he is a bad sailor, declares that he has never yet discovered any pleasure in a sea-trip. As far as he is concerned, it is all bunk.

W. N. U. 2063

Starting Western Career

America Recognizing Importance Of Soy Bean, Popular In Asia

The soy bean, which is the maintenance of so many millions in Asia, is beginning to have a career in America. Those who do not know about the soy bean have to have its excellence broken to them gently or they will be unable to accept all the glowing testimonies paid to its worth. Soy beans are as good as a wife and family and a farm to boot, if one ever does boot a farm. They can be made into almost anything, including fresh milk from the cow without the intermediary assistance of the cow.

Soy beans can also be made into various foods and into motor car accessories, fuel oil, glue, soap and other commodities. Henry Ford has an idea that soy beans may turn small farms into factories, for once the beans are raised they can be manufactured into almost anything the farmer chooses. Ford is encouraging this view by planting a model plot and having them displayed in Chicago. They are not yet being raised in quantity, but if the farmers of America once start growing them, their hardy qualities will make them a favorite crop. The Chinese grow them, though other caterpillars find them toothsome. — Hamilton Spectator.

PARIS FAVORS ROMANTIC COVERED SHOULDERS AND FLUTTERING HEM FOR EVENINGS

To-day's pattern brings this Paris dress to your very door.

The allure of the covered shoulders makes it so much more feminine and flattering. The fluttering hem trails the ground.

You'll look as pretty as a picture in this dress of crisp slipper satin in violet-blue as the original model. It could be carried out in Lyons velvet or taffeta, with equally charming result.

It's simplicity itself to make it. The small cost will surprise you.

Style No. 459 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 6 1/2 yards of 38-inch material and 7 yards binding. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

"Hey! You just put that hat back on my head. Do you want me to get sunstroke?" — The Humorist, London.

Development Of Television

Trials Made In Germany Said To Have Resulted Favorably

The German post office announces a spectacular plan to introduce "television-telephony" in the near future.

Trials between Berlin and Munich, were reported to have resulted favorably. Postal authorities planned to install television-telephony net between the larger cities, further extension of the system depending on public reaction "because of the still high cost of apparatus."

The announcement was made while Germans still thrilled at what technicians called "satisfactory" sound film broadcasts, which were demonstrated at the 11th German radio show by means of a "television car."

Daily transmission of tone films taken from the top of a television car of the German Radio Company stationed in the immediate vicinity of Berlin's radio tower captivated thousands at the radio show.

Scenes were shot with an ordinary sound picture camera from the top of the car and were developed and ready for reproduction after 75 seconds. The car was equipped with developing and transmitting apparatus.

The technical side of the procedure reveals that each picture is dissected into dots by means of a perforated disc. The dots are converted into electric impulses which are broadcast on a seven-metre wave length while sound is transmitted simultaneously over an ordinary radio wave.

Technical appliances permit transmission of 20 pictures a second.

The receiving set is equipped with a large tube based upon the cathode ray system. The tube produces a short stream of invisible electrons which are thrown on a fluorescent screen. The pictures appear clearly.

Method Greatly Improved

To produce and harvest the wheat crop of the three Prairie Provinces by the methods used 100 years ago would require the labor of all the farmers of Canada, their sons, and their hired men ten hours per day for a period of 113 days, or about the normal period from seed time to harvest.

The famous dust storm of 1901 which fell practically all over Europe had its origin in the Sahara Desert.

The Family Of Smith

Organization Started In Australia

"Are you a Smith?" is a favorite question in Sydney and Melbourne, Australia, since the organization of the Family of Smith. There are many evasive answers, because members are supposed to do their good deeds without revealing anything about themselves. The Family of Smith was organized to help the unemployed, but is including aid to the needy in general. To be Smith and act Smith is to spend at least one day or its equivalent each year in helping the other fellow. Another rule is that within six months after becoming Smith one must induce one other person to join the Family of Smith. The organization is growing rapidly.

Safeguarding Fire Calls

New Instrument Is Being Tried Out In London

A new fire call is being tried out in London. Anybody making a false call will be caught in the act. If a man sends in a call a device in the call box automatically grasps his wrist and holds him until the firemen arrive, when he is released. The new instrument not only serves to prevent false alarms, which cost the London county council alone about \$100,000 a year, but holds the person giving the call at the signal station to direct firemen to the fire.

Valued At Hundred Million

Canada's Gold Production For Year May Be Exported

Exports of gold from Canada during the current year are expected to be in the neighborhood of \$100,000,000 provided the production is all exported. Dr. Charles Cannell, deputy minister of mines, informed a party of Princeton students who spent a weekend in Ottawa. The students, headed by R. M. Field, professor of geology, have been visiting the leading Canadian mining centres.

The people of the United States, considered in toto, have between ten and fifteen trillions hairs on their heads.

The James river is the largest river in Virginia.

HIS MAJESTY LENDS A HAND

King George joins with the crew in hauling on the main sheet of his yacht "Britannia", which won the race for big yachts at the Royal Southampton Yacht Club Regatta at Cowes, Isle of Wight.

Efficiency Of Inspectors Has Made The Dominion The Best Egg Market In The World

Objects To Purple Roofs

Lord Leverhulme Has No Freak Buildings On His Estate

Plans for preserving the amenities of the countryside were revealed by Lord Leverhulme at a meeting in London, where he spoke of a ban on sham timber and the prohibition of purple roofs in his Cheshire estate. "On my estate in Cheshire," he said "I have a rule that no building may be erected on any land I sell or lease without the plans and elevations being approved by my advisory architect."

Some conditions Lord Leverhulme imposes are yellow brick not to be used in the elevations; terra-cotta, glazed or hard patent red bricks are not to be used in face work; purple slates are not permitted on roofs; all half-timber work must be properly constructed and framed together and must not be sham; and no colored glass shall be permitted in the windows.

Within reasonable limits, his lordship added, a great deal could be done to prevent some of the bad development at present taking place.

Should A Duck Swim?

Too Much Exercise Bad For Them States Authority

From the creation of the first farmyard a pond has been regarded as the essential complement to the duck's happiness.

Now comes "Duck and Goose," a bulletin published by His Majesty's stationary office, to chide the farmer for believing that his ducks should swim. Swimming is only a purposeless recreation where ducks are concerned, according to his authority.

Though it is grudgingly admitted that swimming tends to keep ducks clean of body and contented of mind.

Swimming, says the bulletin, provides the ducks with too much exercise.

Fire Danger From Smoking

Cigarette Smoking Blamed For 10,000 Fires Annually

J. Grove Smith, Dominion fire commissioner, of Ottawa, laid stress in a paper before the Association of Canadian Fire Marshals on the number of fires originating from tobacco smoking.

Use of cigarettes by persons of all ages and both sexes has resulted in smoking being blamed for almost 10,000 fires annually, said Mr. Smith. Mr. Smith noted fatalities from fires in Canada, numbering 254 in 1933, were 31 less than in 1931.

Yielded Good Crop

A field of Colosse barley yielding 57 bushels to the acre, was threshed by the Field Husbandry Department of the University of Saskatchewan. This is a hooded variety of good feeding quality. Superior bronze grass, a strain developed at the university, has yielded nine bushels of seed to the acre.

Cactus plants cannot live without water, and they grow better in summer if they get a good deal of moisture.

Economic conditions in Austria continue to improve.

Price cutting through misrepresentation of quality is effectively controlled in Canada so far as eggs are concerned through the rigid application on consuming markets of the egg grading regulations. The egg inspection staff of the Poultry Services of the Dominion Department of Agriculture is constantly guarding the interests of the producer in this respect. Since the first of the present year twenty-eight prosecutions have been conducted against wholesale and retail distributors in the larger centres for misrepresentation of grade. All these prosecutions were successful and fines were levied in each instance. The minimum fine under the Egg Regulations is \$25 and the maximum \$500.

The Canadian Egg Grading Regulations were designed with one major object in view namely, to improve prices and marketing conditions in the interests of producers. In the various activities of the egg inspection service none is regarded as more essential than that of preventing eggs of an inferior grade being sold under a higher grade at reduced prices.

The majority of wholesale and retail distributors of eggs in Canada make an honest effort to sell eggs under their proper grade. Occasionally, however, in the stress of business competition, an attempt is made to gain trade through offering at reduced prices eggs which are represented to be of the highest grade but which really are of inferior quality. There is also a certain class of traders with whom such practices are common. If a constant check on misrepresentation of this nature was not maintained the result would be a continual decline of egg prices.

The quality and grading of eggs in wholesale and retail stores is subject to continual supervision by officers of the Dominion Department of Agriculture egg inspection service. Where eggs of lower grade are required to be regarded or marked with their proper grade name. Shipments from a wholesaler to a retailer, when found below grade, are required to be returned to the seller. Where infractions are continued or flagrantly deliberate, legal action is taken. This constant vigilance on the part of Canada's egg inspectors has made the Dominion over a period of years, the highest priced egg market in the world.

Will Improve Conditions

Philadelphia Zoo To Use Moats Instead Of Fences

With a view toward providing the animals with conditions approximating their native habitats, the Philadelphia Zoological Garden is now engaged in an extensive program of eliminating fences around animal runs.

Soon all the animals in the zoo, including lions, tigers, leopards, etc., will be roaming about in areas resembling their natural habitat, with no suggestion of an enclosure between them and the public.

This will be accomplished by substituting wire fences with deep, concrete-faced moats, over which it will be impossible for the animals to leap.

Looking across the moats, which are concealed by a slight rise in the ground level, visitors are given the impression the animals are roaming about free, with no enclosure of any sort.

Two such "fenceless runs," built with CWA funds, already have been opened. One is occupied by the blue heron, while the other run is occupied by two bad-tempered llamas.

In a snake pit, built along similar lines as the "fenceless runs," visitors may view more than 100 lizards, turtles and snakes mingling together in their natural surroundings.

Far-Famed Florence

Florence, Italy, was once the centre of world culture and world finance. There are names associated with Florence that will endure for all time. Some of them are Michelangelo, the Medici, Dante Alighieri, Boccaccio, Machiavelli, Della Robbia, Leonardo da Vinci, Benvenuto Cellini and Raphael.

Variety Of Products

Canada shipped a large variety of products to South Africa last year, over 200 different commodities, including apples, rolled oats, wheat, flour, canned vegetables, binder twine, preserved fish, lumber, agricultural and other implements, etc.

WORLD HAPPENINGS BRIEFLY TOLD

The French plane Aro-En-Ciel arrived at Natal, Brazil, after successfully flying the south Atlantic from Dakar, French West Africa.

Dr. Carl Olof Jensen, one of the world's most eminent cancer research workers, died recently at Copenhagen of apoplexy.

A new attendance record was recorded at the Canadian National Exhibition with 265,000 persons entering the grounds on Labor Day.

The "Ontario Bulletin," official publication of the Ontario government offices in London, England, has ceased publication as the result of the government's decision to abolish the office.

The British Columbia board of industrial relations is considering minimum wage regulations for male office workers. Adam Bell, chairman of the board and deputy minister of labor, announced.

The U.S. farm administration reported that up to August 31 it had purchased 4,250,000 cattle in more than a score of drought states for which part payment of \$38,811,870 already has gone to nearly 250,000 farmers.

Returned from a five-week tour of the northwest, Stan Johnson, western district manager for Booth Fisheries Canadian Co., Ltd., said that the fish catch in the northern prairie provinces has been "enormous" this summer.

A delegation of the Japan Prohibition League visited Premier Keiuniki Okada and urged that the sake-issuing official give up the use of alcohol. The premier listened long enough to ascertain the object of his visitors and then turned away without answering.

George Batho, of the Manitoba department of agriculture, announced the finding of a new weed plague in Manitoba. Field bindweed, he said, had been located near Winkler, in the southern part of the province. He said it was the first time the weed has been encountered in Manitoba.

Little Journeys In Science

CORN PRODUCTS

(By Gordon H. Guest, M.A.)
Corn, which grows abundantly on this continent and in the West Indies, is perhaps one of the most widely used grains. Apart from being a common food in the form of meal or cereal, the kernel when opened, is found to have three parts: the outside, or husk, the small oily germ, and the mass of white material which is mostly starch.

One bushel of corn gives approximately one pound of oil which is refined and sold as a vegetable fat for cooking. The less refined grades are utilized for soap making or for the production of glycerine and nitroglycerine.

Starch from the corn is made into corn starch, for cooking, and into laundry starch.

Another important use of this grain is in making corn syrup which is a widely used product. Corn syrup is made by converting the starch in the corn into a sugar, known as glucose, through treating it with acid in large pressure tanks under fifty pounds of steam. This treatment changes the starch into the thick sweet substance which we know as corn syrup.

From corn also is extracted a type of gum, which is used in place of rubber to some extent. "Red rubber" erasers and sponges may be made from this substance. It is also used in the manufacture of rubber soles for shoes.

Outer husks of the corn and some residue of the oil products are made into cattle food, adding still another to the many products of this common grain.

Silencing The Bore

"The world's a small place," said the bore. "For instance at Easter in Paris I met a man who lives in the next road to me. Later I met him in Venice, then in Rome, again in Alexandria, and finally I crossed the channel with him. What do you think of that?"

"Why didn't you pay him what you owed him in the first place?" asked the little man in the corner.

A flight through a heavy rain by a plane equipped with a wooden propeller will eat away several inches of the propeller.

It requires two and a half months for a shipment of Canadian flour to reach Calcutta from Vancouver.

W. N. U. 2063

What Does Your Handwriting Tell?

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

Handwriting analysis, to be accurate and helpful to the writer, must be based on lengthy research and a painstaking regard for basic values.

I am repeatedly asked if there is anything magical about character reading from handwriting. So I am taking this opportunity of again stressing that when I make an analysis of a specimen of hand writing, I am not literally taking a rabbit out of your best hat, in the approved conjuring manner!

It may seem to the lay-person that, for a Grapho-Analyst to give what turns out to be an accurate analysis from handwriting, to possess the regular magician's trick—a sort of Houdini cum Maskelyne cum Thurston device.

Nothing could be further from the truth. It is simply a scientific evaluation of the indications revealed to the practiced grapho-analytic eye by the handwriting specimen. When you go to a doctor, and tells you that you have a certain organic ailment, you do not imbue him mentally with his diagnosis. You know that his medical education, his training, his research and his practice, have all balanced into an ability to diagnose ailments. He himself will not regard himself as infallible; he may, quite possibly, call in extra-medical advice from his conferees.

And even if, as on occasion doctors do, he makes a mistake, you do not stigmatize medical men as quacks. . . . Because doctors have not yet done it, and tells you, you do not hesitate to go to a medical man when you are suffering pain, or feel that you have some physical derangement.

Grapho-Analyst, like medicine and surgery, is still searching for hidden truths about its own science. It is making tremendous and rapid strides. But do not damn it because, some time in the past, you have been disatisfied with one particular member's analysis.

I have been asked of what practical value is it to people, to have their handwriting analysed. As well might one ask what use is it to a salesman to learn how to become a better salesman; or a business man to know more about his business; or a nurse to gain a better understanding of, and more tolerant sympathy with her patients.

For, as all these are sensible suggestions, so is it just as essential for you to know yourself. Grapho-Analyst shows you not only your general characteristics, but hidden tendencies that may burst into characteristics at any time.

It shows you where are your faults, and thereby gives you the capacity to correct them. And it always puts a person on the path to greater personal understanding, and enables one to get more from others. Here are a few brief extracts from analyses made for readers:

E. C.—There is a frank, generous and sympathetic nature revealed. One who longs for affection, but is sensitive to praise or blame; too sensitive to harsh criticism. You have a strong desire for intellectual companionship, and have a love of the beautiful in nature or art.

T. A.—Your writing shows that you have an enquiring turn of mind; you wish to get to the bottom of things, but you are inclined to be a little forgetful about those things in which you are interested and to slight them. Don't let this grow.

A. W.—You have a material nature, and are likely to consider your own interest at all times, before responding to appeals from others. You are not inherently generous. Do not let this grow. "Honesty" or "meanness".

Do you want a personal analysis of your own handwriting? Write now your faults and virtues? It will probably amuse you with its revelations of your character, and may open the door of opportunity to you. Send a letter in your normal writing, and state your development. Enclose with 10c coin (for each specimen) and 3c stamped address envelope to: Lawrence Hibbert, Grapho-Analyst, c/o Winnipeg Newspaper Union, 175 McDermott Ave., E., Winnipeg.

Racial Prejudice

Britisher Says Canadians Will Find Strength In Union

Citizens of the Dominion be they of French, English, Jewish, Swedish, Irish or Scottish ancestry were warned against racial prejudice and urged never to forget that first, last and always they are Canadians. Reminder that "you will find strength in union," came from Rt. Hon. H. A. L. Fisher, former minister of education in Great Britain and warden of New College, Oxford, speaking at a civic luncheon in Montreal tendered the official delegates of Great Britain, France and the United States to the quarter-century Jacques Cartier celebrations.

An Amazing Machine

An amazing machine which thinks, likes, dislikes, forgets and remembers, and chooses its food has just been invented by a young American scientist in Boston. It can show resentment when its hair is pulled, and shake its head in disgust at food it has been taught to dislike.

A new microscope is equipped with a four-eyepiece attachment for monocular observation instead of the usual one.

Louis L. Lang, President, Galt, Ont.

Frank W. Reineck, Chief Farm Manager

J. F. Weston, Vice-President

T. O. F. Herzer, General Manager

Colonization Finance Corporation

Inspection Trip To The West By Officials Of The Organization

Mr. Louis L. Lang, of Galt, Ontario, president of the Colonization Finance Corporation, stated on arrival at Winnipeg, "This is the second inspection trip made by myself, but is the first trip which is being undertaken jointly with executive officers of member companies associated in the work of the Colonization Finance Corporation. My colleagues on this inspection tour are, Mr. J. F. Weston, vice-president of the Colonization Finance Corporation and managing director of the Imperial Life Assurance Company; A. N. Mitchell, general manager of the Canada Life Assurance Company, and W. H. Somerville, general manager of the Mutual Life Assurance Company. We are interested in the farm management program of our corporation because we realize what improvement to agriculture means to Eastern Canada as well as to the business interests in the West. This year marks the fifth year of the operation of our corporation.

Beginning in 1930 with 25,000 acres under the supervision of two field staff of fifteen farm managers and assistant farm managers covering all of Manitoba and Eastern Saskatchewan. The zone farm managers' headquarters are at Winnipeg, Carman, Portage la Prairie, Brandon, Killarney, Deloraine, Virden, Birtle and Dauphin in Manitoba, and Oxbow, Moosomin, Weyburn, Indian Head, Yorkton, and Canora in Saskatchewan. These men have under their supervision 1,763 farms, totaling 602,582 acres. About 70% of these farms are occupied and operated by their farmer owners; the interests of our member companies being represented by mortgage or an agreement of sale. Only 30% of the farms are operated by tenants. One of the objects of our work is to assist farmers to retain the farms they are at present operating by co-operating with them in any improvements which are possible, and also to make it possible for a substantial number

of tenants to purchase the farms which they are at present farming under lease. The farm management service supplied by the Colonization Finance Corporation covers at present all of the arable land in Manitoba from the international boundary north to township 38, and the Eastern part of Saskatchewan as far as Regina. On July 1st we established a farm management zone in the Swan River area, the only district we had not covered until this year.

The object of this inspection trip for my associates and myself is to inspect the work which is being carried on, to note how it is being regarded by the individual farmers and the communities and districts in which we operate, and to give us the necessary information with which we can formulate a policy for the future of this work, which I believe to be worth while. As rapidly as conditions warrant, and as qualified men can be obtained and trained for farm managers, we hope to open new zones. The necessary attention to detail and the cost of this work are naturally limiting factors.

While Mr. Somerville and I have not met most of the farm managers last year, I am particularly pleased with the conference arranged at Clear Lake in the Riding Mountain National Park which will give Mr. A. N. Mitchell, and our Vice-president, Mr. J. F. Weston, an opportunity of meeting and sizing up our men in the field.

There was one change made in our personnel during the year, Mr. O. S. Longman, zone manager at Indian Head, was appointed Field Corps Commissioner for the province of Alberta and he was succeeded by Mr. W. C. McKillop, former Dean of the Manitoba Agricultural College whose zone we shall visit. Our last year took us through Southern Manitoba, particularly that portion affected by the drought and Southern and South Eastern Saskatchewan. This year we have planned to visit the eastern portion of the Red River Valley; we shall visit the Portage and the Minnedosa and Neepawa districts, and we expect to visit the Swan River Valley. We shall be accompanied by Mr. W. R. McConnell of Regina, by a number of our managers in the West, and officials of our corporation. In Saskatchewan we expect to visit farms in the Canora, Yorkton, and Indian Head zones. We shall bring our Colonization Finance Corporation inspection trip to a close at Regina, after which some of our party are returning west while others are proceeding westward on business of their respective individual companies.

Basis For Security

Complete prevention of war, not "simply a little attempt to humanize it," will give the world the security it wants, Arthur Henderson, president of the disarmament conference, told the Co-operative Societies of England at a meeting in London.

Gliding tests are to be made by German air pilots over the South Atlantic.

SUNDAY SCHOOL LESSON

SEPTEMBER 16

ISAIAH CONTRASTS FALSE AND TRUE WORSHIP

Golden text:

Who shall ascend into the hill of the Lord?
And who shall stand in his holy place?

He that hath clean hands, and a pure heart,
Isaiah 43:4

Lesson: Isaiah 1:1-31.

Devotional Reading: John 4:20-24

Explanations And Comments

The Perverseness of God's People, verses 1-9. "The Great Arrangement" is an apt phrase given to this chapter by Ewald. God's chosen people have rebelled against him. Even the dumb animals, the ox and the ass, are responsive to their masters, but the people of Judah do not consider their Lord. This perverseness has brought punishment upon them, and it is only because of Jehovah's mercy that they have escaped the fate of the people of Sodom and Gomorrah.

Outward Signs of Religious Zeal Do Not Deceive Jehovah, verses 10-15. The prophet Isaiah now hears in spirit the remonstrance of his audience. Delitzsch thinks, "They would fain represent the accusations which he had just uttered as unfounded, by appealing to their exact observance of the divine law; but in opposition to this ground of self-justification which the prophet has read out of the hearts of those impeached, he but proceeds to prove the divine arraignment which begins in verse ten."

"Hear the word of Jehovah, ye rulers of Sodom," the prophet cries; "give ear unto the law of our God, ye people of Gomorrah." By addressing them as "rulers of Sodom" and "people of Gomorrah," he reminds them alike of their wickedness and of their danger. The "law" to which he bids them give heed, is the inspired discourse he is about to deliver.

"What unto me is the multitude of your sacrifices?" saith Jehovah: "I have had enough of the burnt-offerings, rams, and the fat of fed beasts; and I delight not in the blood of bullocks, or of lambs, or of he-goats, nor in their altars reeked with the blood of sacrifices, but it was all an expression of religiousness, not of religion."

The Nature of True Worship, verses 16, 17. "Wash you, make you clean," are figurative words for repentance and amendment. Reckon David's cry after his great sin: "Create in me a clean heart, O God, and renew a right spirit within me."

"Cease to do evil; learn to do well." It is not enough to cease from sin. True worship consists also in right living, in service for others.

Silence Zone

Motor Horn Order Gives British

People A Chance To Sleep

An "anti-horning" order to motor-ists during sleeping hours has proven so successful in London that the ministry of transport has decided to extend it to every city, town and "built-up" area in the country.

True England will become a vast silence zone between the hours of 11:30 p.m. and 7 a.m. so far as motor horns are concerned.

Had Long Job

Topographers at Wellesley, Mass., have been working for nine years on a huge map of the United States. When finished it will be 63 feet long, 46 feet wide, and will show every mountain and valley in the country reproduced exactly to scale in height and size. Eventually it will contain 900 blocks.

Thomas Jefferson was 33 years old when he drafted the Declaration of Independence.

Rome is to have an auditorium seating 5,000 people.

G. F. TOWERS IS TO BE HEAD OF CENTRAL BANK

Ottawa.—The Dominion government has appointed one of the youngest of Canada's leading bank executives to head the new central bank now in process of establishment. He is Graham Ford Towers, assistant general manager of the Royal Bank of Canada, who will celebrate his 37th birthday in a few weeks.

Appointment of Mr. Towers as first governor of the Bank of Canada was announced by Hon. E. N. Rhodes, minister of finance, upon whose shoulders rests the responsibility of initiating and establishing the new institution.

Born and educated in Montreal, Mr. Towers joined the Royal Bank 14 years ago as an economist and secured experience in foreign banking through his subsequent activities as inspector of branches in Cuba. His career has been one of swift advancement and he has published a volume on "Financing Foreign Trade" which brought him considerable acclaim in financial circles.

In accordance with the legislation authorizing establishment of the central bank Mr. Towers' term of office will be seven years, after which he will be eligible for reappointment. He will leave shortly to visit European central banks to gain experience and knowledge of assistance to him in his new work. It is anticipated the Bank of Canada will be in operation shortly after the new year.

It is the intention of the government that a deputy governor will be secured from some other central bank within the empire so in its initial stages the Bank of Canada may have the services of one high executive with practical experience.

With the problem of electing a supreme head for the bank now solved it is understood further organization will go forward rapidly. There will be a deputy governor and possibly an assistant governor. Rhodes will also have to recommend to the governor-in-council the names of seven shareholders who will act with the governor and deputy governor as the board of directors. This of course cannot be done until the capital of \$5,000,000 has been offered and subscribed for, which will be done shortly.

Ottawa will be the main office of the central bank and decision is expected shortly on the premises to be chosen.

Fatten Western Lambs

Federal Plan To Assist Sheep Ranchers In Saskatchewan

Toronto.—Hon. Robt. Weir, Dominion minister of agriculture, announced approval of a plan whereby western range feeder lambs would be fattened in Eastern Canada. Members of the Southern Saskatchewan Sheep Breeders' Association have signed 7,000 head of feeder lambs for shipment to eastern feeding points. Officials of the Dominion livestock branch will find suitable feeding farms and supervise feeding, fattening and marketing operations. Members of the ranchers' association have agreed to consign lambs for fattening under the terms of a rancher-feeder agreement whereby a valuation of three cents a pound is placed on the lambs at the Moose Jaw stock yards.

Freight from shipping point to feed lot will be added to the initial price charged the feeder when lambs go to the feed lot. Freight charges will be met by the Dominion department of agriculture, the department to be reimbursed when sales are made. Ranchers will maintain ownership of the lambs until marketed when the rancher and feeder will obtain their share of proceeds.

To Test Sobriety

Moscow.—An instrument to test sobriety, called an alcoholometer, has been introduced to police stations in Soviet Russia. The suspect is required to breathe through the neck of a glass tube, filled with colorless liquid, for 15 seconds. If the suspect is sober, the liquid becomes pale red; if drunk, a cloudy grey.

Flagship Leaves Vancouver

Vancouver.—H.M.S. Norfolk, flagship of the British West India fleet, sailed from here after a four-day visit, bound for her base at Bermuda and thence to England. She is due at Bermuda, October 17, and will return to England the following month.

W. N. U. 2063

Customs Officers Seize Opium

Tins Concealed In Third Class Steerage Cabin

Vancouver.—(Opium valued at \$6,000 was seized by Canadian customs officers on board the Canadian Pacific steamship Hser Empress of Asia here.

The opium, contained in 200 one-tin tins, was concealed in the false bottom of a wardrobe cupboard in a third class stateroom in the after part of the ship.

One-tin tins have seldom been seen here, most of the opium seized being contained in five-tin tins. Authorities believe the drug was intended for either Honolulu or Manila.

It was the first opium seizure here in months. No arrest has been made.

Heard The Program

Manager Of Arctic Post Gets Radio Reception From Steamer

Montreal.—"Oh, yes, we heard your speech and also the piccolo," said the manager of an Arctic post of the Hudson's Bay Company to its governor, Ashley Cooper. "The piccolo," Mr. Cooper said, in telling of the incident to a local service club, was a bagpipe broadcast. Mr. Cooper has just returned from visiting the company's northern stations in the steamer Nasopik. During the trip he broadcast addresses and the pipers played reels on the bagpipes.

Try For New Record

Sir Malcolm Campbell Plans To Speed At Five Miles A Minute

London.—Sir Malcolm Campbell, British auto speed king, disclosed at a luncheon here that his plans were about complete to make another assault on his own world automobile speed mark at Daytona Beach, Fla., in January. It was there he set the present world record, 272.108 miles an hour a year and a half ago. Since then he has remodelled Bluebird, his racing car.

His goal is a speed of 300 miles an hour—five miles a minute.

Frost Damages Oats

Prospect Of Seed In North Is Not Promising

Prince Albert, Sask.—Frost has taken its toll of oat fields in northern Saskatchewan and the prospect of seed for the 1935 crop is anything but promising. R. R. Tooley, chief supervisor of the Soldier Settlement Board, Saskatchewan branch, stated here.

The quality has deteriorated in some districts to such an extent it is unlikely farmers of the north will have a surplus seedling the 1935 crop, Mr. Tooley said.

Rests With Membership

Socialist Party And C.C.F. Taking Vote On Merger

Vancouver.—The proposed merger of the British Columbia branch of the Co-operative Commonwealth Federation and the Socialist Party of Canada will rest with the general membership. The C.C.F. provincial council has decided to submit the question to a referendum of members of each constituency body. The vote will be taken as soon as possible and a return must be made within 90 days.

Oppose Emigration Plan

Weymouth, Eng.—Delegates to the Trades Union congress were warned by J. McLeod, Canadian delegate, against emigration schemes "put forward by some members of the House of Commons." He declared such schemes would be "fraught with difficulties, privations and want" and there was provision for substantial government grants covering a period of years.

Use Canadian Coal

Ottawa.—For the purpose of encouraging greater use of Canadian mined soft coal, the Dominion government has restored the 99 per cent drawback on imported bituminous used for cooking purposes providing the coke manufacturers use 35 per cent Canadian coal.

Market For Bacon

Toronto.—Canadian farmers who could supply the British market with a continuous supply of high quality bacon had unlimited opportunities, Canadian National Exhibition directors were told at a luncheon by Hon. G. Howard Ferguson, high commissioner to London.

Turkey Would Join League

Geneva.—Turkey has decided to present herself as candidate for the League of Nations council next to be vacated this month by China.

In Favorable Position

Canada Is Friendly In Relations With Other Countries

Montreal.—While abroad there is little cause for "cheerful spirit," Canada is in a favorable position, its relations with other countries being friendly, the committee on international relations reported to the Canadian Bar Association in annual convention here.

At present, the report notes, the whole world is faced with a situation in which members of each of the many groups are discussing how best to destroy one another. Each of them is silently conscious that both defender and aggressor in any conflict will be destroyed as a likely result, without any assurance that one group or nation will emerge clearly dominant, the report contends.

Need Larger Army

U.S. Secretary Of War Says Present Force Is Inadequate

Raritan Arsenal, N.J.—Secretary of War George Dern said the United States needed a larger, more effective regular army.

The secretary, who came here for the concluding four days of the army's war game manoeuvres against an imaginary enemy invader, said he thought the regular army was not adequately equipped at present, and advocated increasing its strength from 125,000 to 165,000 men.

"The army," he said, "is sadly in need of modernization and mechanization. At its present size the army is not large enough to perform all the peace time tasks assigned to it."

A DEMAND FOR CANADIAN WHEAT IN UNITED STATES

Winnipeg.—With a shortage of durum wheat in United States becoming more and more apparent, demand for Canadian Durum by United States mills reached a season's peak on the Winnipeg Grain Exchange with the movement south of the international boundary approximating 500,000 bushels. Such exports total about 1,000,000 bushels covering the last two weeks.

Recently top grades of durum wheat were commanding a 32-cent premium over the September future at both Duluth and Minneapolis, while Canadian Durums were quoted at 17½ cents over Winnipeg October option. This brings the Canadian Durums quotation to approximately \$1.1 a bushel which despite the 42-cents-a-bushel duty and 2½ cents-a-bushel handling charges still makes the Canadian grain considerably under the United States price.

The United States Durum price at Duluth was \$1.28½ per bushel plus a 32-cent premium making a total of \$1.60½.

Bulk of Canadian Durum wheat is grown in Manitoba and supplies of this variety are being quickly cleaned up.

PRINCESS MARINA TO FLY TO ENGLAND

News comes from Yugoslavia that Prince George and Princess Marina, whose engagement was announced a few days ago, will fly to England to receive the blessing of King George and Queen Mary. The 27-year-old Greek Princess and her British fiancé, are shown above. It is expected the wedding will take place at Westminster Abbey some time in December.

FIRST WOMAN PILOT

Mrs. Amy Johnson Mollison, the first woman appointed as regular pilot of a transport plane on the London-to-Paris route, explains that she took the job for experience in all-weather flying in preparation for a London to Australia flight this fall.

St. Lawrence Waterway

Matter May Be Taken Up In Next Session Of U.S. Senate

Hyde Park, N.Y.—Frank P. Walsh, chairman of the New York power authority, after a talk with President Roosevelt, predicted re-submission of the St. Lawrence waterways pact with Canada to the next session of the United States senate and its ratification.

He has just returned from the northwestern states.

He issued the following statement after his visit with Mr. Roosevelt: "The project will be re-submitted at the January session, and I am confident construction work will get under way in the spring. The Great Lakes and the St. Lawrence river are perhaps our most valuable natural resources, and they will be fully developed and utilized in the public interest, for both power and navigation purposes, as an integral part of the public works program."

"The present Roosevelt administration will build the St. Lawrence project, and thus give the United States a new seacoast 3,800 miles in length, placing Chicago, Milwaukee, Cleveland, Detroit, Toronto, Superior, Duluth and other great inland cities on deep-water, and give the northwest 1,000,000 horsepower of the cheapest electricity in the world."

Deal With Health Matters

Would Hold Special Conference With Provincial Representatives At Ottawa

Victoria.—A special conference of provincial representatives at Ottawa to discuss health matters is being considered, Hon. G. M. Weir, British Columbia provincial secretary, stated here. This province is particularly interested and would support centralized control for dealing with major health problems.

Dr. Weir stated B.C. is paying \$700,000 a year for the health bills of persons from other provinces.

U.S. Textile Strike

Two Men Killed And Many Wounded In Disorders

Washington.—Rioting and death suddenly punctuated the gigantic United States textile strike even as capital and labor prepared to lay their grievances before a board of President Roosevelt's choosing.

Two men were killed, another was near death, more than a score were wounded by bullets and clubs as a wave of violence surged through the strike-torn mill towns of Georgia and the Carolinas.

Francis J. Gorman, chairman of the textile strike committee, blamed "management and reactionary public officials" for the bloodshed. He warned that a continuance would awaken "all the bitterness that can be aroused" in the ranks of the textile army.

Women Out Of Industry

Mussolini Plans To Replace Men In Jobs Held By Women

Rome.—Benito Mussolini was reported planning to take all women workers out of Italy's industry.

Two reasons it was reliably learned, influenced II Duce in his decision. Jobs, he holds, interfere with what he believes to be woman's primary duty, the building up of families and the increase of Italy's population.

The positions women hold should be filled with men, thus decreasing unemployment and raising the morale of the people.

An editorial in "Mussolini's" newspaper, Popolo D'Italia of Milan, tended to confirm the report that he will move to eliminate woman workers.

Call Of The Clouds

Col. Bishop, War Ace, To Take Up Flying Again

Montreal.—The call of the clouds has once more gripped Canada's ranking wartime flying ace, Lieut. Col. W. A. Bishop, V.C. After an absence of 12 years from active flying, he has decided to climb back into the cockpit. He is now taking instruction at the Montreal Light Aeroplane Club field preparatory to regaining a pilot's license.

Col. Bishop, however, is only going into flying again for personal reasons. He wants to be able to commute between Montreal and his summer home in Muskoka, Ont.

HITLER DECLARES REVOLUTION IN GERMANY AT END

Nurnberg, Germany.—Adolf Hitler, dictator of Germany, declared here: "The National Social revolution is ended. It has fulfilled all its hopes."

This declaration he made at the annual convention of the Nazi party, through Robert Wagner, Baden Nazi district leader, who read the proclamation.

Dr. Fuehrer said revolutions which took a permanent character resulted in anarchy and chaos and merely served the purposes of greedy politicians, and that an evolution had to come to bring about better conditions.

The German leader said the German way of life was fixed for the next 1,000 years, during which time there would be no further revolutions. He described the German regimes of the past 60 years as run by international freebooters and pot-hous politicians. He declared later generations would exact the accomplishments of the Nazi movement as the "German miracle."

Then he turned to the recent plebiscite, and stated:

"If foreigners imagine the 4,000,000 'No' voters constituted a dangerous opposition, they are privileged to smile. . . . Our next attack will demolish the opposition."

Hitler reiterated that Germany while insisting on her own right, wanted peace and friendship with others.

He took up the subject of religion, saying: "We have endeavored to reconcile the religious confessions with the new state. As far as the Protestants are concerned, we are determined to weld them all into one great evangelical reich church."

Concerning the Roman Catholic Church, he said: "Despite lapses on both sides, we shall arrive at a sincere and honorable understanding." Hitler concluded with a statement that the program was to consolidate the party organizations such as the Schutz Staffel, or picked guard, and the storm troops, into one solid bloc comprised of all elements that were no heart and soul with them, to win over all those who still held aloof.

WANT STIFFER PENALTIES GIVEN FOR KIDNAPPING

Montreal.—Kidnapping and its proper punishment occupied the attention of the Canadian Bar Association at its annual meeting here. In a round table conference a motion recommending the criminal code be amended so as to permit judges to impose the lash in sentences under five years was carried. When the matter came up in the convention as a whole the lash recommendation was dropped and the association went on record as recommending the criminal code be amended in order to give the courts jurisdiction to impose more severe sentences in kidnapping cases.

On the suggestion of Mr. Justice J. B. M. Baxter of New Brunswick that it was inexpedient for members of the association to discuss details of punishment and that legislation was not the field of discussion of the convention the recommendation of the committee was altered to carry merely the suggestion that the code be amended to carry more severe penalties than now exist. Judges and lawyers from all parts of the Dominion took part in the debate on kidnapping. Hon. A. W. Roebuck, K.C., attorney-general in view of the recent Labatt abduction case, occupied the chair when the question came up before the meeting of the association on the recommendation of the committee of administration of criminal justice, that lashes be imposed for the crime.

Suggestions that the funds of people abducted and their relatives be sequestered by the crown made in a speech by Mr. Roebuck, were not approved by a majority of the members after a long debate. E. J. Murphy, K.C., Toronto, declared kidnapping was the act of a brutal man. The danger of preventing ransom was that if it was not paid the kidnappers would probably do away with the victim. He said the Dillinger life meant nothing when they wanted to protect themselves.

Judge R. H. Murray, Halifax, thought the remedy for criminals was not punishment but bringing under control. He hoped to embody in a bill to be presented to the Ontario legislature at its next session power to enable the police to suppress the bank account of a kidnapped man and those of his relatives so they could be forcibly prevented from paying ransom money.

Fodder Export

Plan For Exporting Manitoba Straw And Hay To U.S. Is Arranged

Winnipeg.—Arthur MacNamara, deputy minister of labor for Manitoba and chairman of the provincial drought relief committee, stated all machinery for exporting 250,000 tons of straw and hay to United States for relief purposes has been established.

Those wishing to make such exports, he said may obtain application forms from the Dominion seed branch here but before the applications are authorized they must be approved by the drought committee.

Criticizes Paintings

Toronto.—George Leroux, official representative of the Academie des Beaux Arts, Paris, France, criticized the paintings by Canadian artists who originally constituted the "group of seven" during a visit to the Canadian National Exhibition art gallery. The French artist said the paintings were unnatural and lacked the spirit of love.

Scott Accepts Post

Toronto.—The provisional committee of the Canadian corps council, organized following the veterans' reunion here early in August, has received acceptance of the honorary presidency of the council from Archdeacon F. G. Scott of Quebec, "beloved padre" of the Canadian forces overseas.

Would Build Pulp Mill

Vancouver.—Possibility for a sulphide pulp mill on the British Columbia coast are being investigated by R. O. Sweeney, Montreal financier, for British capitalists interested in supplying England with raw material for artificial silk and paper manufacturing, he said here.

How To Buy Butter

Encouraging The Consumer To Demand The Highest Grade

Among the eight Acts relating to agriculture passed during the last session of parliament, the bill relating to the dairy industry has a particular appeal to the consumer in that it deals with commodities which are in daily use in every Canadian household. Of particular interest to the creamery industry and to the housewife are the new regulations providing for the grading of butter for domestic consumption and the placing of the grade of the butter on the wrapper and on the carton. This grading is optional except in provinces which may pass enabling legislation. The regulations also prohibit the making of false, misleading or exaggerated claims with respect to the quality of butter or any other dairy product, whether such claims are made by advertisement or on the package.

The grading of butter for domestic consumption has been established in the hope that the quality will be improved through the preference of the consumer for higher quality. In the past there has been much second grade butter sold under fancy trade names that did not convey anything to the consumer as to quality. It is expected that the placing of the grade on the carton and wrapper will mean that the consumer will be encouraged to ask for "First Grade" butter, thereby discouraging the manufacture of lower grades. Also, it is expected that the indication of the grade will have a tendency to create a wider differential of price between the grades and ultimately reflect back in the price received for the cream by the producer. In other words, it is expected there will be better prices all round.

The grades of creamery butter are first grade, second grade, third grade, and no grade. "No grade butter," according to the regulations, means and includes any butter on which any mould has appeared either on the butter itself or on the parchment lining on the package, as well as any butter otherwise inferior to third grade. A dairy produce grader may refuse to grade any butter or cheese which in his judgment is either too high or too low a temperature to permit of proper examination, until the temperature is brought within satisfactory range. The graders are the only persons allowed to mark or brand the packages, and no person is allowed to pack butter in a package which bears any of the grade marks stamped by the official grader.

Something Never Attained

Absolute Stillness Possible It Would Be Unbearable

Absolute stillness is practically never attained. A room that was absolutely quiet would be unbearable, according to research engineers, who have recently tried to construct such a room and have found it as close to obtaining one as they care to. To get their quiet room it was necessary for them to suspend one in space, leaving no rigid connections with the rest of the building. The ceiling is hung from the rafters and is not attached to the wall. The floor and the walls are suspended on cushions or springs, and the interior is completely padded or muffled. The effect obtained is that of a room which floats free of all efforts and in which it is a part. Noises from other parts of the building, from the floor below, penetrate the room not as sounds but as feelings—they are felt, not heard. A visitor who maps his fingers has the sensation of having just set off a cannon, and if he watches the sensitive indicator of the audio noise meter, he will see that the ordinarily spinning fan has sent the pointer spinning far to one side.

These Boys Can Cook

Two Brothers Of Stratford, Ontario, Rated As Experts

Whether it is baking powder biscuits, cookies, red currant jelly, pickles or candy you want, 12-year-old Allan and 10-year-old Fred, sons of Mr. and Mrs. G. W. Heagy of Stratford, Ontario, are the boys to see. Between them they entered 26 varieties of home cooking and pie-baking in the Canadian National Exhibition competitions at Toronto. Allan's talents in the baking line lean toward muffins, gingerbread, plain cake and cookies, but Fred's abilities run to such things as layer cakes, sponge cakes, apple pie and gems. He can turn out doughnuts that are the dream of many a cooking expert.

The largest producer of patent leather among nations is the United States.

W. N. U. 2068

SALVAGERS NEAR THE END OF THE EGYPT'S GOLD

With the salvaging of another \$5,000,000 of gold from the sunken liner, Egypt, the salvage ship "Artiglio" is believed to have recovered nearly the whole of the treasure. For years the salvagers have been working hard to recover the gold bullion, but it has been a most difficult feat, because of the depth at which the liner lies in the English Channel. The success of the work has been largely due to the use of the suction apparatus, which has been specially designed for deep salvage operations. At the left is a view of the suction cylinder being emptied on board the Artiglio, while the picture at the right shows the end of the instrument.

Dangers of Mountain Climbing

Attempt Fails To Scale The Invincible Peak Of Mount Waddington

Mount Waddington continues to fling out its challenge to mountaineers of the world, the challenge of an "unscalable" peak.

Mr. and Mrs. Don Munday, a boy whose early gaze went across flat prairie from his home in Portage la Prairie, Man., and a girl born among the ten plantations of Coyton, know most about this invincible pile and declare it can't be climbed. They returned recently from their latest assault, a six-weeks' drive, and said the trip, too, was the opinion of their companions on the expedition, Henry S. Hall, Jr., of Boston, and Hans Fuhrer, Swiss guide. The latter two have proceeded to make an attempt on Mount Robson in the Canadian Rockies.

"The main peak will never be climbed," Munday declared. "Mrs. Munday, Mr. Hall, myself and the guide, Hans Fuhrer, climbed the second summit from Jale Glacier, but the higher of the twin peaks appears to be unscalable."

The party's final attempt on Waddington was made from a camp 20 miles up the giant Franklin Glacier after a storm which lasted nine days. The attempt failed but the mountaineers were non-committal as to the hardships they endured and the dangers they faced in the perilous climb.

The Mundays left Vancouver July 11 and, with the aid of packers, back-packed supplies up the 30-mile-long Franklin Glacier from Knight Inlet. They were joined at the end of the month by Hall and Fuhrer and started the assault on glacier-studded Waddington at once.

The Mundays were the first to scale the lower peak several years ago and they have made several expeditions into the wild region near the mountain. Hall made an unsuccessful attempt to climb Waddington last year, and Fuhrer is a veteran guide, noted for his excellent judgment in ice and snow. He was a guide for several seasons in Jasper National Park.

The rock monkey has already claimed one life this season. Alec Dalgleish, of Vancouver, fell to his death June 26 as he and three companions made an unsuccessful attempt to scale the ice-cruised precipices below the summit.

The Munday en route in to the Waddington region, met a group of Vancouver alpinists returning after burying Dalgleish amid the high snows of Buckler Glacier, far up the mountain. The chance meeting was a grim reminder of the dangers they would face in their assault upon the virgin south-east peak.

"Tree-Branch" Music

August Knauer of Mayerhofen, in Tyrol, is making himself famous by his tree-branch music. He converts the crooked limbs of trees into wind instruments from which he really extracts music. One piece resembles an eight-foot saxophone, but gives more pleasing music.

"It is dangerous for any girl to throw herself at a man, however eligible he may be," we read. But where is the danger if he is a good catch?

Completing Mountain Road

Work In Alberta Will Take Three More Seasons

That 51 miles of a total of 147 of the New Lake Louise and Jasper highway are finished, that the whole work will take three more seasons and that \$600,000 is the value of the work so far done, were statements made at Banff by J. M. Wardle, supervisor and chief engineer of national parks, who recently returned from a pack-train trip through the country between the ends of the completed sections.

"The new road will be an important cut-off," he stated. "It will connect the trans-Canada, running through Calgary and Revelstoke and the projected trans-continent highway, to run through Edmonton and Jasper and down the Thompson river. It is the most ambitious mountain project attempted in Western Canada. It will not be less than 18 feet wide and no bend will be more than 10 per cent. curvature. The road so far completed could have rails laid on it excepting for the fact that in some places it goes to four or five per cent. grade."

Chess Developments

Says Crooners And Trombonists Have It All Over The Football Player

Husky football players with brawny arms, bulging chests and sturdy legs may be fine physical specimens, but they actually have less chess expansion than crooners, flute players and horn tooters, according to Dr. H. C. Carlson, of the department of physical education, University of Pittsburgh. Addressing coaches attending the Kerr-Carlson coaching school at Colgate University, Dr. Carlson said he had examined hundreds of men and had found invariably that the men with the big chest expansion are singers and blowers of wind instruments.

Napoleon used balloons at the battle of Fleurus in 1794 to observe the enemy lines from a great distance.

Prestige of Canadian Corps

Improvement Of Conditions For Ex-Servicemen Of Vital Necessity

"Re-establishment of the prestige of the Canadian Corps and Allied Veterans is a vital necessity to the improvement of general conditions for the ex-servicemen," says a statement issued by provisional officers of the Canadian Corps Council, "and with the whole-hearted co-operation of your units we feel that this can be accomplished."

The council is an out-growth of the corps reunion held in Toronto, when representatives of many units of the Canadian Corps, Imperial and other Allied forces met and elected a provisional council, carrying on the work of organization until such time as a permanent council can be established.

The statement reported the provisional council was engaged in drawing up a constitution and bylaws, and was seeking suggestions from all unit associations of ex-servicemen, to the end that every unit be represented by brigades or other groups of units associations. It appealed for the starting of unit associations where none exist.

"It is our earnest desire to co-operate with all other veteran organizations," the statement said, "but at the same time to maintain the spirit and traditions of the Canadian corps and other Allied forces to perpetuate their friendships, associations and memories, and to uphold the solidarity of the British Commonwealth of Nations."

Date From Roman Times

Several forceps and other surgical instruments found in Ljubljana, in Jugoslavia, by workmen digging the foundations of a church, are believed to date from Roman times. The instruments were in an earthen urn, which also contained ashes, and it is assumed that the ashes were those of a doctor whose instruments were buried with him.

Polish authorities seized 105,000 pounds of tobacco being smuggled over the frontier during 1933.

Scientists Making Progress

Have Restored Life To Animals Killed By Nitrogen Gas

Restoration of life to animals put to death clinically by nitrogen gas, an achievement declared to be much more difficult than that involved in revivification of a creature asphyxiated with ether or chloroform, was disclosed at the laboratory of Dr. Robert E. Cornish, in Berkeley, California.

Although the latest experiments have been successful in maintaining the "renewed" life only a few days after restoration, the scientific significance is regarded as outweighing that in which Dr. Cornish revived Thirteen, the Irish terrier, after he had been put to death, according to clinical standards, by ether.

The difference is that in asphyxiation by chloroform or ether, enough air remains in the blood so that if heart action and respiration are restored within a few minutes the damage to the brain cells is slight.

On the other hand, "death" through such causes as nitrogen, carbon monoxide (auto exhaust fumes) and hydrocyanic gas was considered to cause such instantaneous injury to the delicate mechanisms of the brain as to preclude its ever functioning again sufficiently to maintain even partial life processes.

The possible eventual application of the new achievement to human beings, it is believed may be of vastly greater importance. There are said to be few if any authenticated cases where persons have been revived after stoppage of heart action and gen. carbon monoxide and cyanide. gen. carbon monoxide and cyanide.

Smallest Radios In World

Watchmaker Built Both Sets Under Double Magnifying Glass

Ten years ago Rufus P. Turner, a watchmaker, of Waltham, Mass., started a hobby of making small radios. To-day he stands on the threshold of virtually being idolized by dwellers of apartment houses, where the unceasing blare of radios has caused loss of sleep, quarrels with neighbors, breaking up of homes, and infidelity.

Turner holds two of the smallest radios in the world, one built on the shaft and head of a common straight pin, the second, a little larger, but yet small enough that it can pass through the eye of a needle. Thousands of persons are now viewing Turner's accomplishments at Chicago where both sets are on exhibition, the second of which he completed recently.

Turner's sets were made under a double magnifying glass and minute instruments. He made two "coils," one of a "very fine piece of platinum wire, .001 of an inch in diameter, a second of copper wire, .001 of an inch thick." Contact between the two "coils" produced rectifying action which enabled Turner to pick radio programs with the aid of a 300-foot aerial.

Barophones are used, there being no possible way to amplify the sound through a loudspeaker.

Highways Of The Sky

Air Travel On European Routes Is Increasing Rapidly

Traffic on the European air routes continues to increase steadily. During the course of a single day, just recently, more than 250 passengers flew between London and Paris in the big air-liners of Imperial Airways. Air transport, with its luxury and speed, not only reduces from hours to hours the time required in journeys across the Continent, but it robs long-distance travel of discomfort and fatigue. Recent speed-ups, for example, now enable air passengers from London to reach Berlin in 4 hours, 15 minutes; Copenhagen in 5 hours, 25 minutes; Rome in 9 hours, 15 minutes; and Madrid in 12 hours, 10 minutes; while times have also been reduced, considerably, on many of the longer flights across Europe. To Moscow, for instance, by present schedules, the actual flying time from London is only 17 hours, 5 minutes, while to a point as distant as Istanbul it is not more than 17 hours, 55 minutes.

Malta's Official Language

Malta has been declared the official language of the British island of Malta, and will hereafter be recognized as such in the Maltese courts. The large Italian population of the island has heretofore urged Italianization of the country, and the Maltese tongue was recognized only in a semi-official way.

Mars rotates on its axis in 24 hours, 37 minutes and 22 seconds, so that its day is only slightly longer than that of the earth.

Qualia feed the farmer by eating many weed seeds.

Agricultural Notes

Interesting Items Gleaned From Many Sources

The air mail postage from Canada to the British Isles is now six cents for the first ounce, and five cents each ounce after.

Exports of Canadian live cattle to the British Isles for 1934 from January 1 up to August 23rd totalled 34,196 as against 32,637 for the corresponding period of 1933.

The number of hogs graded in Canada for the first 34 weeks of 1934 ending August 23, was 1,853,642 compared with 2,068,468 for the corresponding period of 1933.

Shipments of livestock from Western to Eastern Canada from January 1 to August 17, 1934 included 53,028 cattle; 540 calves; 146,135 hogs; and 45,000 sheep.

With the egg export season close at hand, there are indications that there will again be an active export trade in Canadian eggs to the British Isles.

Total exports from Canada to Australia for the fiscal year ended June 30, 1933, were valued at \$2,315,462.

Delayed storms plays an important part as a cause of soil acid and soggy breakdown of apples.

Fiji Islanders are very fond of Canadian canned strawberries. This Canadian product has a very wide sale in the Fiji Islands, Canada also being the chief source of supply to the Fijians of fresh salmon, and smoked and canned fish.

The production of creamery butter in Canada in July, 1934, amounting to 35,146,278 pounds, showed an increase of 3,307,602 pounds compared with July 1933, the provinces contributing to the increase being Quebec, Ontario, Manitoba, Saskatchewan, Alberta, and British Columbia.

The excessive holding up of stocks of non-perishable products of unknown dimensions in times of depression is apt to prolong the period by the feeling of uncertainty it engenders, and purely speculative transactions in perishable commodities is inimicable to orderly marketing and confident buying.—Lord Bledisloe.

During the month of July 1934, 11,000,000 lbs. of bacon were exported to Great Britain as compared with 1,500,000 lbs. during July, 1933, the total shipments of bacon for the first seven months of 1934 amounting to 81,504,600 lbs. as against 38,787,700 lbs. during the corresponding seven months of 1933.

When packing eggs for shipment, a good practice is to brush the hand lightly over each filler as it is packed to make sure that no eggs are protruding above the top of the filler. Such eggs almost invariably will break in transit. Before packing a case, examine the bottom and sides. If any nails are loose or have fallen out, replace them.—Egg and Poultry Market Review.

Will Winter In Canada

French Countess Leaves Castle To Follow Trap-Lines

Castles in France have been exchanged for a trapper's camp in northern Manitoba by Countess Guyot de Milshegen, who plans to spend the winter in trap line north of Sheridan in search of new experiences.

Countess Guyot is no stranger to Canada. For several years she has visited Canada forests in search of moose and deer during the hunting season. Her explorations have included canoe journeys from Roberval to James Bay and down the northern rivers. During her last visit she followed a trap line for three weeks in the north and became so enamored of the life that this winter she will stake out her own trapping territory.

Countess Guyot went to The Pas, Manitoba, and from there to Sheridan where her equipment, including sleigh dogs, canoes and outboard motors was waiting. After building her main camp miles away from civilization, she will set up two out-post camps and follow the trap line during the winter season.

Walks Miles To Feed Birds

Leo Fleich, 17, who lives at Superior, Wisconsin, who wants to be a naturalist, walks five miles every day with a pail of freshly-dug worms which he feeds to 200, or more, baby birds in their nests. His customers include robins, blackbirds, catbirds, marsh wrens and flickers.

Plants are most active during the period between noon and three in the afternoon.

The strongest known timber is yate, one of Australia's hard woods.

Manchuria is to have many new highways.

The Victoria Cross was instituted in 1856.

FANCIFUL FABLES

OCCASIONAL WIFE

By EDNA ROBB WEBSTER
Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, desiring to live their own lives until Peter is able to provide for her. Peter is a young, attractive sculptor, a scholar and a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter. Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, the "Red and Blue" party, they go to a cabaret to continue the party. Peter and Camilla sit off to the beach by their knees and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing over them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio Avis Werth calls may not think so, Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis "Inspiration." Peter adopts the latter title and Camilla, heartless, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue which has shattered the place. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

Camilla's advertising campaign and Tiny Tots broadcast was a success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the last departure from New York, he is on his way to his cabin when he meets Avis Werth. During the voyage Avis tells Peter that Camilla smashed his scholarship exhibit in a fit of temper, and he believes her. He calls on Camilla and confesses it was he who destroyed Peter's model.

(Now Go With The Story)

CHAPTER LX

A peremptory summons from Mr. Hoyt on the day after Gus Matson's visit, took Camilla to his office in a state of trepidation. Had something unusual happened? Was he angry with her for her presumption and deception? Had his pleasant attitude at the broadcasting station been only a masked act, for the sake of his pride? It would be like him, perhaps.

She approached the inner office almost with a feeling that the man whom she was about to meet was a stranger to her. But his greeting was cordial enough—even affectionate.

"I've been waiting to talk to you my dear. You gave me the surprise of my life the other day."

"Was it very wrong of me to decide you, dad?" she appealed wistfully.

His eyes twinkled as she never had seen them before. "I'm mighty glad you did. You proved to me what I always suspected that you could do. Even when your mother opposed your ambition to take up commercial art, I held a secret conviction that you could make good. With your determination, I could see that any encouragement from me would be superfluous, and only antagonize your mother more." He exchanged with her that look which she remembered so well from her childhood, a glance of understanding which made words useless.

"Nothing could have pleased me more than the way you have developed. I will admit that I never should have dreamed of placing my business promotion into your inexperienced hands, much as I believed in you. So I engaged efficiency experts and paid a large fee to an advertising agency to handle the campaign. And, after all, it fell right into your inexperienced hands, and you pulled us to victory. It only goes to show that the wisest of us haven't so much judgment, after all, no matter how big we think we are. Well—that is just a little of life's irony."

"It would be worse than irony if I hadn't made good," she reminded him with a timid smile.

"But you did!" he dismissed the matter with a wave of his hand, and descended abruptly. "But what about Peter? Are you going to let your marriage fall, now that you have succeeded in your career?"

"Oh, no!" Camilla denied. "You know why I did not go abroad with Peter. We are living according to our original contract, of course."

"What good will your contract be a year from now?"

"Why—Peter loves me, dad!"

"I don't doubt it. I know he does. But when people love each other and are married, they should be together; at least, for most of the time I tell you, Camilla, I feel it my duty to advise you from a man's standpoint. Your place is with Peter in Paris, or wherever he is."

"But he can't take care of me and he won't accept my help. He is terribly proud."

"Of course. But what about Avis Werth?" he released another bomb.

"Do you know that she is on the same boat with Peter?"

"Yes, but—"

"That is no coincidence," he interrupted, sternly. "Camilla, I may as well confess that I've kept a pretty close watch over your private affairs since you left us. Your happiness is my deepest concern. I did not like your marriage plans when first learned about them, and this separation has made them preposterous. I tell you I won't stand by and see you lose Peter. I know what he means to you—may not think so," his voice lowered and he seemed to be projected for a moment into a distant past, "but I, too, know what love can mean. But you will lose Peter, if you permit this thing to go on—at least, you will lose the Peter and the love with which you began so confidently."

"Oh, I do wish so much to be with Peter," she confessed. "But he won't have me, under the circumstances."

"Is there any objection to your living apart in Paris, and seeing each other often, as you did here?"

"I suppose not. But I can't leave my work and live there on nothing."

"Listen to me, my dear. If necessary, there always could be some one found to fill your place in your work but not in Peter's life. And that is not even necessary. It will be a simple matter to find someone to take over your radio programs, even someone whose voice so resembles yours that the public never would recognize a substitute, if that is more advisable. You have started the programs personally. Now, there is no reason why you can't pack up and rest of your work and take it right over to Paris with you. That will solve the problem of present existence. You can provide for yourself very well, but I also make the requirement that you and Peter are to take a comfortable studio, large enough to accommodate the work and privacy and temperaments of two geniuses," he smiled slyly, "and live together. You will discover what happiness is, then."

"But Peter won't live that way when I have the advantage over him. He hasn't even a start in Paris yet."

"As for Peter, I have managed some other things which may amuse his wounded pride." Hoyt continued placidly. "I have arranged for a large replica of his exhibit group to be given a prominent place in this city, but he never will know who promoted the movement. You will guard the secret for his sake. It is not philanthropy—I was only given the hand of destiny for starting the movement."

"As for your future, my dear child, you are my sole heir to the fortune which you have salvaged. However, that is not a new idea. I always expected to bequeath the bulk of my estate to you, but I purposely insisted when your mother took you that I should not acknowledge you as an heir, so that you would be forced to prove yourself. I had confidence that you would, which increased as you grew older. That you accomplished it through your own efforts to reclaim my business, is another one of those inexplicable twists of fate. But I advise you," he warned her with twinkling eyes, "that you had better not tell your proud Peter you are an heiress. Let him be surprised when the time comes."

Fourth Motion For Earth

Hurl World In Great Circles States U.S. Astronomer

Dr. Roscoe F. Sanford said he has found new evidence that the earth has a fourth motion which hurled it about in a great circle at a rate estimated by astronomers at 150 miles a second.

He also found additional proof of a third motion in which the earth follows the sun among neighboring stars at a rate of twelve miles a second.

"The motion of the earth on its axis, giving day and night, and that in its orbit, producing the march of the seasons, are common every-day experiences," said Dr. Sanford, astronomer of the Carnegie Institution's Mount Wilson Observatory.

"Not so obvious is the motion of the earth as an attendant of the sun as it moves among the other stars, and even less so the motions on a grand scale of the sun and its neighbors in colossal orbits about the centre of our galaxy, or the Milky Way star system."

"A recent test of both these motions has been afforded by the Mount Wilson velocities in the line of sight of 146 cool, red stars which are scattered about the sun at distances which average about two thousand light years (12,000,000,000,000 miles)."

"The analysis of these confirm the motion of the sun as previously determined, showing a speed of twelve miles a second toward the constellation of Lyra, and give fair evidence that these stars revolve around the galactic centre in Sagittarius, with those which are closer doing so the more rapidly."

"We humans are therefore moving through space by a complication of motions consisting of those about the earth's axis and orbit, with the sun among the stars and with the sun about the galaxy—to say nothing of what may be that of the galaxy as a whole."

In support of this fifth motion, Dr. Sanford and other astronomers at the Mount Wilson Observatory have observed other great star systems far out in space moving rapidly away from the Milky Way system, the more distant the star system, or nebula, the greater its apparent motion.

The astronomers take it for granted that if an observer were on one of these nebulae, the Milky Way system would appear to be moving away from it.

Little Helps For This Week

"He that abideth in me and I in him bringeth forth much fruit." John 15:5.

"Let the beauty of the Lord our God be upon us." Psalm 90:17.

As some rare perfume in a vase of clay
Pervades it with a fragrance not

So, when Thou dwellest in a mortal soul
All heavenly own sweetness seems about it thrown.

Some glances of real beauty may be seen in their faces who dwell in time meekness. There is a harmony in the sound of that voice to which Divine love gives utterance, and some appearance of right order in their temper and conduct whose passions are regulated.—John Woolman.

I believe that no Divine truth can dwell in any heart without an external testimony in manner, bearing, and appearance, that must reach the witness in the heart of the beholder and bear an unmistakable, though silent, evidence to the eternal principle from which it emanates.

When she arrived in Canada Gudrum determined to learn the language as quickly as possible. She had been taught English in her native land, but only to a small extent, so she had to study hard at first, sometimes three and four hours each night.

Originally part of the English language came from the Danish, she said, "and that was of greatest assistance to me."

Gudrum likes Canada very much, and plans to stay here the rest of her life, although, she remarked wistfully, "I'd like to go back home some time."

The farthest north public school building in Manitoba is being erected in Churchill by Churchill residents. A male teacher will be sent north by Manitoba department of education as soon as the building is completed. Twelve children are already enrolled as pupils.

Girls seem to alter from year to year, mentions a seaside dweller. But the men look just the same.

Stanley Reid has brought to the Chronicle office a potato of the Golden Wonder variety that weighs exactly 1 pound and 14 ounces. Come on Cal.
Signs limiting the speed to 15 miles an hour have been erected by the Council on Main St. Motorists and truck drivers better be careful from now on.

Everett Bills shipped out his fourth car of 1934 wheat on Wednesday. Everett has 900 acres of Garnet wheat and it will average better than 20 bushels to the acre and he is getting the top grade.
Mr. and Mrs. W. Shvon left on Monday for East Coulee, where they will reside for the winter months returning to Crossfield in the spring. Luke Ralsbeck will be in charge of the O. K. Garage during Mr. Shvon's absence.

Owing to alleged sabotage, the Atlantic liner "S. S. Morro Castle" was burned to the water's edge on Saturday morning last within eight miles of the New Jersey shore. The lives unaccounted for at present number 137.
A gasoline truck carrying 1,640 gallons of gasoline caught fire on the highway five miles south of Crossfield Monday evening and was completely destroyed. The tank exploded and the flames from the burning truck could be seen for miles around. The truck was owned by Thos. Parkinson of Calgary, Constable Cameron investigated.

Crossfield School Fair

The fourth annual School Fair was held under ideal weather conditions on Thursday last.
Considering the large number of threshing machines that were at work there was a very fine attendance. No doubt the fact of the men-folk being so busy had some effect on the entries, although they were well up to the average, being a total of 1078.
Favorable comments were heard on all sides of the splendid accommodation here for this Fair. No other School Fair in Alberta has such a building, etc. to call its own, and in the capable hands of Secretary Harry May and his directors everything was carried out on schedule. Following is the list of awards.

SPECIALS
\$3.00 cash donated by R. M. McCool, M.L.A. to the boy winning the most points at the Fair. Won by Clarence Riddell, Greenwood School.
\$3.00 cash donated by R. M. McCool, to the girl winning the most points at the Fair. Won by Melva Whitwood, Glen Rock School.
Silver Cup donated by the Canadian Bank of Commerce to the school winning the most points at the Fair. Won by the Glen Rock School.
Football donated by Western School Supplies, Regina, to the school winning the most points at the Fair. Won by Glen Rock School.

Four hundred of Certified Red Bob West donated by Howard Wright to the winner of the most points in the grain classes. Won by Clarence Riddell.
Silver cup donated by Central Creameries Ltd. for the best type dairy calf. Won by Cecil Walker, Crossfield.
Ewe lamb donated by A. J. Hole, Air-drie, to the boy or girl winning the most points in the livestock classes. Won by Ian Weir, Glen Rock.

(Continued Next Week)
Mrs. I. Ralsbeck whose marriage was solemnized last week was the guest of honor at a kitchen shower on Friday evening at the home of Mrs. Lorraine Nichol.

The bride was presented with many beautiful and useful gifts (including a rolling pin) carried in by little Lorraine Nichol and Ruth McCool.
The evening was spent in bridge after which a very delightful lunch was served by the hostess.

The P. T. Classes will be resumed for the winter months about the first of November.
Three cases of vitamins are prunes, wheat and oranges.

VILLAGE OF CROSSFIELD NOTICE
To Relatives of Persons on the Assessment Roll and to Tenants
Notice is hereby given that during the months of October and November, applications may be made under the provisions of section 165 of the Village Act for inclusion in the voters' list of the Village of Crossfield.
The wife, husband, father and mother and every son and daughter of any person whose name appears upon the assessment roll are entitled to be placed upon the said list—
(a) If he or she is resident with the said person within the village or assists him in a business in respect of which he is taxable; and
(b) If he or she is of the full age of twenty-one years; and
(c) If his or her name does not already appear on the roll; and
(d) If he or she duly makes application in accordance with this notice.
All tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of September of this year, and who duly make application during the months of October and November, are entitled to be placed upon the said list.
For this purpose the office of the secretary-treasurer will be open during the usual office hours in the said month.
Thos. Tredaway,
Sec.-Treas.

NIER NEWS

BORN—To Mr. and Mrs. Angus Robertson on Sept. 5th, a daughter, Miss Elizabeth MacKenzie of Baltimore, Maryland, was the guest of Miss Anne Robertson for a few days this week.

Tom Morrison left recently to attend the races in Winnipeg.
Threshing is in full swing in this district. Some wheat has yielded as high as 30 bushels to the acre.

Miss Bessie Hargreaves returned to her home in Jasper after spending the past few weeks visiting friends here. She made the return trip in a new Ford V8 coupe which she purchased from Leslie Farr.

Mr. and Mrs. H. Wills held a house warming in their new home on Saturday evening.
Mr. and Mrs. Kenneth Borbridge have as their guest the latter's sister, Miss Ruth Lyon of Vancouver, B. C.

P. T. Classes to Commence Early in November

The Crossfield and District Amateur Athletic Association held their regular monthly meeting in the Chronicle office on Saturday evening. Vice-President A. D. Currie presided.

Present: J. A. Emery, P. Gravel, Constable Cameron, W. H. Miller.
The regular monthly meetings will be held on the first Saturday of each month instead of Tuesday as heretofore.

It was decided to hold a dance in the U. F. A. Hall on Friday, Oct. 5th. The Melody Boys Orchestra have been secured for the occasion and a good time is assured.
The sum of \$15.00 was subscribed to help pay the expenses of Miss Margaret Fitzpatrick to the British Empire Trials at London, Ont.

The P. T. Classes will be resumed for the winter months about the first of November.
Three cases of vitamins are prunes, wheat and oranges.

\$60.00 Paid for Collicutt Calf

The pure bred Hereford calf donated to the Calf Club by Frank Collicutt was also sold by auction and brought \$60.00. Garnet Onell, President of the School Fair Association, was the purchaser.

R. J. Hendry paid \$35.00 for the

pure bred Shorthorn heifer donated to the Crossfield Club by the Calf Club of Granger, Alberta. The money from the sale of these calves is paid out as prize money.

Following An Ideal

THE builders of Alberta Pool Elevators, the farm men and women who put their money, their time and their energy into the project, had definite ideas before them.
They wanted a co-operative concern, first and foremost, operating on the basis of a public utility, with the profit motive secondary to that of equity and service, and built upon the foundations of co-operation as established imperishably by the pioneers of the movement.
These ideals and principles have been followed as closely as possible by Alberta Pool Elevators. It is the ambition of the organization to make this co-operative enterprise respected and trusted by all grain growers, its operations an open book to its patrons and its standing built on widespread confidence. In its broad sense, confidence is the foundation of all human relationships which possess the quality of endurance. The growth and life of any institution depends on the confidence it inspires and commands and can hold.
There is no more unanswerable way of expressing confidence in the worthiness of the ideals and objectives of this movement than by deliveries of bushels—wagon loads and car loads of grain to
ALBERTA POOL ELEVATORS
